

Form Validation-Major Project Web Development

A screenshot of a web browser displaying a 'Sign Up Form' on a page with an orange gradient background. The form is a white card with the title 'Sign Up Form' in red. It contains the following fields: 'Full Name' (placeholder: 'Enter Full Name'), 'Email ID' (placeholder: 'Enter Email ID'), 'Gender' (radio buttons for 'Male' and 'Female'), 'Phone Number' (placeholder: 'Enter Phone Number'), 'Password' (placeholder: 'Enter Password' with an eye icon), and 'Confirm Password' (placeholder: 'Confirm Password' with an eye icon). At the bottom of the form is a red 'Submit' button and a checkbox labeled 'I'm not a robot'.

A screenshot of the same 'Sign Up Form' with red error messages. The 'Full Name' field has the message 'Name must be at least 10 characters'. The 'Email ID' field has the message 'Enter a valid email with @'. The 'Phone Number' field has the message 'Phone number must be a 10-digit number'. The 'Password' field has the message 'Password must be at least 8 characters and cannot be 'password' or your name'. The 'Confirm Password' field is empty. The 'Submit' button is still red, and the 'I'm not a robot' checkbox is now checked.

A screenshot of the 'Sign Up Form' after successful submission. A dark grey toast message at the top says 'This page says Your application is submitted' with an 'OK' button. The form fields are now filled with the following data: 'Full Name' is 'Abigail Deralshya', 'Email ID' is 'deralshya2001@gmail.com', 'Gender' has 'Female' selected, 'Phone Number' is '9360264348', 'Password' is masked with '*****', and 'Confirm Password' is 'Abcd@123'. The 'Submit' button is still red, and the 'I'm not a robot' checkbox remains checked.
